

What Threats & Risks?

4 Great Sites to Help Keep You Informed & Aware

All four of these sites update regularly and are a great way to keep on top of all kinds of Man-made and Natural Crises.

DYNAMIC OPEN SOURCE VIRTUAL THREAT MATRIX

UNCLASSIFIED - OPEN SOURCE INTELLIGENCE BRIEF Provided By www.GlobalIncidentMap.com [12:15:54 2011-08-13]

The online version of this open-source brief is unique in that it is dynamic, automatically updating the data which it displays throughout the day, every day. Maps, Graphs, Charts, Predictions, Lists of Recent Incidents, and other items are all updated automatically as new data is added to our databases from which it draws. Our goal is to provide the broadest-scope, most up-to-the-minute open-source brief available. While this product is automated, most of the data it pulls from is manually located, read, qualified, and added to our associated maps/databases. Look for us to add human analytical commentary in the near future.
[Download PDF version of the page](#)

This brief automatically checks for new data every 400 Seconds
 Automatically reload brief when new data are available
